I'm a full-stack mobile engineer based in India. Give me a rough idea and I'll turn it into a real app. Nine years and 30+ shipped apps across iOS, watchOS, iPadOS, and Android, for everyday users and businesses alike. I lead with native iOS and Flutter, and I build the whole thing: the app, the backend, and the release process. I've shipped a spirits-scanning app, a real estate photo app, and a vaping-cessation app used by hundreds of thousands of people. Each one runs on serverless infrastructure I built myself, on Firebase or AWS.
